PERSONAL PROJECTS

Movie Recommendation System

- A Movie Recommendations System project using Python and machine learning typically involves building a system that based on user preferences.
- Popular libraries like Pandas, NumPy, and scikit-learn are often used for data manipulation and model implementation.

Face Recorgnition

- In this project i can use OpenCV(Open Source Computer Vision Library)is an open source computer vision and machine learning Sotware library.

WORK EXPERIENCE

Apprenticeship

Arcane Info Tech

08/2023 - 02/2024

Aliganj , Lucknow

Arcane Infotech Private Limited is a certified company specializing in providing comprehensive training on the latest technologies

- I have completed training in python & machine learning, particularly focusing on data preprocessing and supervised machine learning model during the training.
- Use & Benefit of these modules :- Data preprocessing plays a crucial role in supervised machine learning by cleaning, transforming, and organizing data to prepare it for modeling.

EXTRA-CURRICULAR ACTIVITIES AND ACHIEVEMENTS

HackerRank

Basketball Collage Team Caption

Completed HactoberFest 2021 Challenge

CERTIFICATES

Python (04/2023 - 06/2023)

Machine Learning (07/2023 - 10/2023)

Interview Preparation | Aptitude Rounds (09/2022 - 11/2022)
